Lightcontrol at your fingertips

Almost all of our DALI lights can be equipped with a control module that enables wireless control and networking with the help of a smartphone or tablet. Setting up is very easy and intuitive thanks to bluetooth and an app. The lights can be operated either classically with a switch or by a smart device. Even from anywhere in the world if you want to!

We would be happy to support you in choosing the right components for your project.

CASAMBI

With the Casambi components integrated in our luminaires, you have the total control over your lighting system. From switching or dimming to complex light scenes, everything can be implemented in the simplest possible way.

APP

The free Casambi app is the central administration of your lighting. Simply set up your lighting using the app.

Switch

Define which luminaires or luminaire groups are assigned to which switch for a classical manual control.

Light colour/HCL

RGBW or tunable white lights can also be addressed and controlled by Casambi. Thus, an intuitive automated control for Human Centric Lighting is no problem.

Luminaire groups

Using Casambi, lights can be controlled individually in different groups or as a whole. This makes your lighting more flexible than ever.

Scenes

A wide variety of lighting moods can be implemented in light scenes. These scenes can be recalled by the push of a button or automatically.

Timer

The timer function can be used to time-control your lighting installation.

serio

The all-in package for your medical office

Our single luminaire serio-DENT is the ideal lighting for your dental treatment rooms.It provides the perfect working and ambient light.

Other luminaires in our serio product family, such as our serio pendant luminaires, serio wall luminaires and serio system luminaires, offer numerous possibilities for effective and functional illumination. Together with our serio-DENTa consistent overall concept can be created.

serio - countless possibilities for your rooms!
